- Seminar programme

Dear All,

Over the past two weeks, we have had the pleasure of attending two exciting events, both of which were characterised by inspiring ideas, a valuable exchange of experiences and numerous personal encounters: our **Expert group conference days 2026** and the **SheLeadsTech conference 2026**.

Expert group conference days 2026: Seeing more together

On 29 and 30 September 2026, around 80 active members of our expert groups gathered at the Dorint Kongresshotel Düsseldorf/Neuss for the expert group conference days. The motto ‘Seeing more together’ set the tone for the event.

Sixteen expert groups and the AG DRIVE working group had each designed their own display board in advance: featuring their theme, their members, their achievements in 2026 and their plans for 2027. Working in mixed groups, the participants visited all the display boards in turn, identified areas of overlap between the expert groups and added what they felt was still missing. On the second day, the expert groups took up these ideas and incorporated them jointly into their plans for 2027.

Alongside the specialist work, there was plenty of time for socialising. A particular highlight was the murder mystery dinner ‘Lord Moad Invites You’ by Tatort Dinner, which rounded off the first day in an exciting and entertaining way.

The conference days demonstrated what sets our community apart: commitment, professional expertise and a willingness to share knowledge. A heartfelt thank you to all participants, to the expert group leaders and to everyone who volunteers their time and ideas to the work of the expert groups.

The next expert group conference is expected to take place from 22 to 23 September 2027 in Stuttgart.

Would you like to get involved too? Then take a look at our expert groups and become part of the community!

SheLeadsTech conference 2026: Overcoming barriers together and shaping the future

A day full of inspiration, exciting ideas and international networking: on 6 October 2026, the SheLeadsTech Conference took place in Munich – for the first time as a joint event organised by the ISACA chapters from Germany, Austria and Switzerland.

The conference brought together professionals and executives from across Europe and beyond. The focus was on current challenges and future issues relating to cybersecurity, digital sovereignty, AI governance and leadership. High-calibre female speakers, engaging discussions and numerous personal encounters made the event a truly special experience.

Yet the SheLeadsTech Conference was far more than just a professional event: it impressively demonstrated how important diversity, mutual support and strong networks are for the future of our industry. The initiative creates space for new perspectives, highlights female role models and encourages us to drive change together.

Special thanks go to the organising team from Germany, Austria and Switzerland. Through great personal dedication and countless hours of voluntary work, they have transformed an idea into an international conference. We would also like to thank all the speakers, participants and sponsors who, through their commitment and contributions, helped make this special event a success.

Our conclusion: When people, ideas and networks come together across national borders, something special is created. That is exactly what SheLeadsTech stands for!
